JBI SUMARI

NEW & IMPROVED

The Joanna Briggs Institute (JBI) premier software for the systematic review of literature

The System for the Unified Management, Assessment and Review of Information (SUMARI) is the Joanna Briggs Institute's premier software for the systematic review of literature. It is designed to assist researchers and practitioners in fields such as health, social sciences and humanities to appraise and synthesis evidence of feasibility, appropriateness, meaningfulness and effectiveness; to conduct economic evaluations of activities and interventions.

SUMARI is designed to facilitate the entire review process, from protocol development, team management, study selection, critical appraisal, data extraction, data synthesis and writing a systematic review report.

Think of it as a word processor, reference management program, statistical and qualitative data analysis program all in one, easy-to-use web application.

From JBI, leaders in providing the best available evidence to inform clinical decision making.

Who can use SUMARI?

- Librarians
- Medical Researchers
- Physicians & Physician Leadership
- Nurses & Nursing Leadership
- Allied Health
- Academic Professors
- CIO, System Admin
- Biotech/Pharma teams

From Protocol To Report

JBI SUMARI supports the entire review process, from drafting your protocol, study selection, critical appraisal, data extraction and synthesis. It also allows you to manage review teams and contributors to your review.

Scientific Credibility

JBI SUMARI is designed based upon the guidance of the Joanna Briggs Institute, and as such all methods are supported and approved by the international scientific committee. SUMARI users can conduct reviews and know that they are following a sound and rigorous methodology.

Multiple Review Types

With JBI SUMARI, you can conduct standalone reviews of 10 various types (including effectiveness, qualitative and prevalence) of systematic reviews. Additionally, you can choose to include multiple approaches within the one review.
